State/UI: Zustand, Shadcn/ui, Tailwind CSS, Framer Motion
DB: PostgreSQL, MySQL, MongoDB/Mongoose, Firebase
Tools: Git/GitHub, Jest, Playwright, Figma, VS Code, Vercel

EXPERIENCE

Fullstack Engineer

Dec. 2025 – Present

RockaiDev

Egypt

- Engineered PropAI CRM, a role-based React 19/Vite frontend for real-estate sales, implementing AI lead insights, KPI dashboards, and permission-based access control.
- Developed Done Egypt (doneeg.com), a Next.js 16 multilingual real-estate platform featuring Mapbox/Leaflet integrations, property comparisons, and an AI voice/text assistant.
- Architected KMC Medical, a full-stack e-commerce system with a NestJS REST API, React admin dashboard, and Next.js storefront, Cloudinary .
- Collaborated with cross-functional teams to deliver production-ready code with comprehensive Jest and Playwright testing coverage.

PROJECTS

Done Egypt (doneeg.com) — Real Estate Platform

2026

- Built a production-grade, multilingual real-estate Next.js 16 platform for discovering properties and developers.
- Implemented advanced search, map-based exploration (Mapbox/Leaflet), and property comparison features.
- Integrated a floating AI chat/voice assistant for guided search and contextual recommendations.
- Ensured production readiness with a Dockerized standalone build and high-coverage Jest/Playwright testing.

PropAI CRM — SaaS Frontend

2026

- Developed a role-based, multi-module CRM frontend for real-estate teams using React 19, TypeScript, and Vite.
- Built comprehensive lead management tools with search, filtering, status tracking, and AI-driven insights.
- Implemented secure, permission-based access control and real-time push notifications for analytics and workflows.

KMC Medical — Full-Stack E-commerce System

2026

- Designed a 3-part architecture: Next.js public storefront, React/Vite admin dashboard, and scalable NestJS backend.
- Built comprehensive e-commerce workflows for medical products, including cart logic, order lifecycles, and payments.
- Implemented JWT authentication with role-based permissions and social login integrations (Google).
- Developed admin operational tooling with Excel/CSV export capabilities and automated SendGrid email notifications.

Nourborsa FinTech Platform

Aug. 2025

- Built a comprehensive stock market analysis platform providing real-time data and technical indicators.
- Implemented dynamic charting and financial management tools to help users track and analyze market trends.
- Optimized backend performance for handling large datasets and concurrent user requests using Node.js.
- Live demo: nourborsa.com

Ramsa E-commerce Platform

May 2025

- Fully responsive Arabic-first e-commerce platform for handcrafted coffee tools.
- Advanced cart logic using Zustand, Telegram Bot messaging, and Facebook Pixel tracking.
- Live demo: ramsa.vercel.app
